### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Examiner has been amended the following:

#### **IN THE ABSTRACT:**

In line 3, "comprises" has been changed to --includes--.

#### ***Allowable Subject Matter***

2. Claims 1-3 are allowed over the prior art.
3. The prior art of record does not teach or render obvious the combination, cooperation and interaction that applicant claimed a connector connectable to a coaxial cable, the connector comprising a body includes an outer sleeve, an inner sleeve and a forward rotatable nut; a hollow cylindrical coupling fitted on a rear section of the outer sleeve and having a rear inwardly extending flange; and a flexible sealing ring, wherein the ring surrounded by the coupling, the ring includes flared front and rear ends and a narrow intermediate section, and wherein the front end of the ring is spaced apart from a rear end of the outer sleeve prior to coupling the connector to the

Art Unit: 2839

cable and the rear end is urged against the flange, when a front end of the cable is inserted into the coupling, the coupling is pushed forward and will compress the ring to urge the front end of the ring against the rear end of the outer sleeve and further recess the intermediate section to fasten on a shield of the cable, as recited with other elements in the claim 1.

### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spinner (US 3,907,399), Rodrigues et al. (US 6,530,807) and Holland et al. (US 6,217,383), show the alternate designs of the coaxial cable connectors having different types of couplings and sealing rings.
